

Your resource for every stage of the reproductive journey.

Our broad women's health test menu offers you the latest science available to help care for your patients.

Initial Office Visit

Labcorp offers lab tests recommended by the American College of Obstetricians and Gynecologists and American Society for Reproductive Medicine for all women as part of their reproductive and prenatal care.

Endocrinology

ReproSURE is a blood test comprised of Anti-Mullerian, follicle-stimulating and estradiol hormones designed to provide information about ovarian reserve.

Thrombophilia

Labcorp's coagulation portfolio offers 40 years of experience as an internationally recognized leader in specialized coagulation. Offering an extensive test menu and a consultative approach ensures clients have the resources to help predict, diagnose, and manage even the most unusual bleeding and clotting disorders.

Donor Testing

Labcorp offers an FDA-registered donor screening laboratory for sperm/egg and known donors and an experienced leader in testing for reproductive donor communities.

Carrier Screening Inheritest® 500 PLUS Panel

Extensive gene coverage:

Panel comprised of more than 500 genes, each associated with a clinically-relevant genetic disorder selected based on American College of Obstetricians and Gynecologists and American College of Medical Genetics criteria. These disorders are focused on severity, early childhood onset, identification of early intervention opportunities and increased childhood mortality.

Infectious Disease

Our **NuSwab portfolio** offers STDs including Mycoplasma Ureaplasma and CT/NG from a single-swab.

Prenatal Testing

Including **MaterniT 21 PLUS** and **MaterniT GENOME** which can detect chromosomal abnormalities as early as 9 weeks in pregnancy.

Maternal Serum Screening

Maternal serum screening, including AFP-only, First Trimester Screen and Integrated, Sequential, and Serum Integrated Screens Part 1 & 2.

Cytogenetic Testing

Including standard chromosome analysis, FISH, **InSight®** (Interphase FISH for Rapid Detection of Numerical Abnormalities of Chromosomes 13, 18, 21, X & Y), and **Reveal® SNP Microarray**.

Why choose Labcorp as your testing partner?

At Labcorp, we offer nearly 5,000 tests, including the latest specialized and genetic innovations so you can be sure you are getting the right test for the right patient at the right time.
