

GENETICS & WOMEN'S HEALTH

Genetic Counseling

Delivering genetics expertise to your patients

Genetic counseling is an integral part of the services we provide to you and your patients.

Our national network of ~100 genetic counselors dedicated to patient care

Labcorp provides accessibility and genetic counseling expertise directly to your patients through our national network of board-certified and state-licensed genetic counselors and medical geneticists.

Our model

Broad, yet flexible, genetic counseling services focused on:

Prenatal and preconception

Infertility

Hereditary cancer

Convenient access providing you with:

Nationwide coverage

Virtual counseling access through audio or video connections

Online scheduling for patients

Personalized patient support

Customizable genetic counseling services to meet your patients' needs

Labcorp's genetic counselors translate and communicate genetic information into practical, understandable terms. They support patients, physicians and other providers through the following process:

1

Identify genetic risks

2

Explain appropriate genetic testing options

3

Discuss implications of test results

4

Support informed decision-making

Labcorp delivers expertise to your practice through genetic counseling services tailored to you and your patients. Call us at 855-GC-CALLS or 855-422-2557.

Our genetic counselors provide a broad range of services to support you and your patients, including:

Genetic Education Video Series

- Patient-friendly targeted education to help patients navigate various genetic testing options and alternatives
- Discussion of benefits, risks and limitations
- Review of implications of genetic testing results
- Videos available on our website, or you can embed the videos on your website—reach out to your Labcorp representative for details

Genetic Results Counseling

- Phone discussion between patient and genetic counselor about the patient's result
- Explanation of the risks identified
- Overview of any appropriate follow-up testing
- Summary report sent to patient and referring provider

Comprehensive Genetic Counseling

- In-depth review of the patient's personal and family medical histories
- Identification of genetic risk factors and appropriate testing options
- Patient education and support for informed decision-making
- Conducted either in-person or via telegenetic counseling through an audio and video connection

Physician and Practice Support

- Coordinated patient care to assist you in offering the right test at the right time
- Written summary for all counseling events and additional case consultation available to you as needed
- Customized training and genetic education for your practice
